8th Sem Major Project Weekly Report
(Demonstration – 1)

Project Title: AgriTech - AI Powered Product Management & Recommendation System for Farmers.

Team Members: Ankush Awana, Ankit Goyal, Kanish Singh Verma **Weekly Progress Report**:

Week	Project Stage	Work Completed	Remarks / Status	Supervisor Signature
Week 1	System Debugging & UI Fixes	Reviewed the previous project and fixed frontend and backend issues. Improved Farmer Dashboard UI and corrected layout alignment with responsive design.	System bugs resolved and Farmer Dashboard layout improved.	
Week 2	Authentication Enhancement	Integrated Firebase Email Verification and implemented Forgot Password functionality to improve login security.	Secure authentication system successfully implemented.	
Week 3	Database Migration	Migrated the database from local MongoDB to MongoDB Atlas and updated backend configuration for cloud database connectivity.	Cloud database successfully connected and tested.	
Week 4	Cloud Deployment & Testing	Deployed the AgriTech website on cloud platform and tested major modules including authentication and product management.	Website deployed successfully and working online.	

Under Progress / Next Phase (Future Work):

- **Analytics Dashboard:** Develop a farmer analytics dashboard to visualize product performance, sales statistics, and demand trends using charts and data visualization.
- **Payment Gateway Integration:** Integrate a secure payment gateway such as Razorpay to enable online product purchase and payment processing.
- **Real-Time Chat System:** Implement a chat feature that allows buyers and farmers to communicate directly within the platform regarding product details and orders.
- **Smart Product Recommendation:** Suggest similar or related products to buyers based on product category and browsing behavior.
